Inspections Fall Arrest Equipment Inspection (T-220)

Program Overview

This program will provide students with fundamental knowledge of inspecting popular types of fall protection equipment. This program is in accordance with local regulations and industry standards.

Training Objectives

Upon completion of the program students will be able to:

- Inspect fall protection equipment and document their findings for the annual inspections as required by law
- Confidently determine if popular fall protection devices and equipment are fit for purpose
- Be familiar with the CSA and ANSI standards
- Explain why equipment is unsafe to use
- Demonstrate inspection methods

Program Content

- Regulations
- Inspection Criteria
- Inspection methods
- Brand specific knowledge
- Information on recalls

Format

The program is a combination of theory and practical exercises. Students are evaluated by means of a written examination and a practical evaluation, which consists of inspecting test equipment. A certificate of completion will be issued which aids in addressing the various legislative requirements placed upon employers to ensure their employees are competent.

Duration

16 hours

Location

The standard program is held at our Head Office and Manufacturing Hub based in Dartmouth, Nova Scotia. However, we are able to utilize our other Hercules locations across the country, or hold the training at your facility.
