

HERCULES

GROUP OF COMPANIES

Forklift Safety (Narrow Aisle/ Counter Balance) (T-500)

Program Overview

This program will provide students with fundamental knowledge of the operation of counter balance and/or stand up forklifts. This program is designed in accordance with local regulations and industry standards.

Training Objectives

Upon completion of the program students will be able to:

- Demonstrate knowledge of the basic requirements of regulations, and their responsibilities
- Demonstrate knowledge of documented pre-use inspections of the machine
- Understanding of the stability triangle
- Demonstrate the basic operation of a counter balance and/or narrow aisle forklift.
- Identify hazards associated with counter balance and narrow aisle forklifts (Workplace hazards)
- Identify safe methods for propane hook up
- Respond appropriately in the event of a tip over.

Program Content

- Introduction to lift trucks
- Stability of a lift truck
- Pre-operational safety check
- Operating a lift truck safely
- Propane, gas and battery refueling
- Battery care
- Hazard awareness

Format

The program is a combination of theory and practical exercises in the classroom and warehouse. Students are evaluated by means of a written examination and an operator practical evaluation. A certificate of completion will be issued which aids in addressing the various legislative requirements placed upon employers to ensure their employees are competent.

Duration

5-8 hours (varies based on class size and number of machines)

Location

The standard program is held at our Head Office and Manufacturing Hub based in Dartmouth, Nova Scotia. However, we are able to utilize our other Hercules locations across the country, or hold the training at your facility.
